INTEX®

COMFORT REST COLLECTION 2022

INTRODUCTION

The Intex Family of companies is dedicated to developing and manufacturing the highest quality products that not only provide the best value in price, but are innovative, fun and exciting. Backed by excellent Customer Service, Intex also provides first-rate after sales support. The 100+ independently owned and locally operated companies that make up the Intex Family, all embrace this commitment to quality, service and price and are committed to working together to ensure the satisfaction of the families and individuals in countries across the globe who enjoy these products. This has become the hallmark of Intex around the world.

As a true industry leader, Intex boasts state of the art factories, trained and motivated people, products that meet rigorous testing requirements, and a Customer Service organization that will go extra lengths to ensure our customers are satisfied and happy with their purchases.

When you purchase an Intex product you can be confident that you are buying the best product, at the best price, backed by the best Customer Service organization in the industry.

2022

Intex is committed to delivering top quality products at a great value. Our Airbed line is unmatched for breadth and beauty. With our innovative, patented Fiber-Tech™ Technology, we have engineered a way to combine durability with exceptional comfort, creating airbeds that rival the stability, support and comfort of a traditional mattress.

Our Comfort Rest® line of airbeds consists of six series designed to meet all your customers' needs: the "Dura-Beam® Standard Series" offers a line of durable and comfortable airbeds with attractive opening price points. "Dura-Beam® Plus Series" features a wide variety of premium quality raised airbeds. "Dura-Beam® Deluxe Series" offers a line of luxurious raised airbeds with enhanced sleeping surfaces. Our top-of-the-line "PremAire® Airbeds" bring a new level of luxury and innovation to our collection. Elegantly designed with puncture resistant laminated PVC exterior, plushy pillow top and superb structural durability, PremAire® Airbeds offer unparalleled comfort. The "Camping" series is engineered for camping, travel, and all-around rugged use, with beds perfectly suited to the outdoor environment. And for the young at heart, our "Air Furniture" series comes with bright colors and fresh design concepts, guaranteed to attract a loyal following of young adults! Ask your Intex representative for any of our product catalogs – we are confident that you will agree that Intex's product line is unmatched in meeting your needs.

COMMITMENT TO EXCELLENCE

Intex's Commitment to Excellence encompasses every single product that leaves our factory. We achieve this by maintaining the highest levels of quality assurance — such as inflating and testing every single airbed to ensure the Air Lock™ guarantee. It's that simple.

In today's rapidly evolving and highly competitive environment, this translates into a total commitment to product quality, including conformity to all relevant safety & quality regulations and standards. Examples include:

- EN 16927, Safety and test methods for mini pools (European standard)
- EN 16582, Safety and test methods for domestic swimming pools other than mini pools (European standard)
- Regulation (EC) No.1907/2006 "Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)"
- EN 71 "Safety of toys" (European standard)
- EN 13138 "Buoyant aids for swimming instruction" (European standard)
- EN ISO 25649 "Floating leisure articles for use on and in the water" (European/ International standard for air mats, lounges and other similar items)
- EN 60335-2-41 "Safety of household and similar electrical appliances, particular requirements for pumps" (European standard for water pumps)
- EN 60335-2-60 "Safety of household and similar electrical appliances, particular requirements for whirlpool baths and whirlpool spas" (European standard for portable SPA)
- ISO 6185-1 "Inflatable boats" (International standard for Sports Boats)
- NMMA-ABYC (USA standard for hi-end sports boats)
- ASTM F963 "Standard Consumer Safety Specification for Toy Safety" (USA toy standard)

- ANSI/APSP-4 "AGP standard" (USA standard for above ground pools)
- CPSIA "Consumer Product Safety Improvement Act" (USA regulation of consumer and children's products)
- ASTM F2666 "Small pools standard" (USA standard for pools under 36" water depth)
- UL1450 "Electric inflators" (USA standard for electric inflators)
- UL1081 "Swimming pool pumps, filters and chlorinators" (USA standard)
- UL1563 "Electric spas" (USA standard for Spa)
- DOE Energy Conservation Standards for Dedicated-Purpose Pool Pumps

Intex's commitment to excellence extends to helping our environment and supporting the ecosystem. It begins with product design. Intex's filter pumps operate on much lower amps than most filter pumps in the market, reducing electricity consumption. Our saltwater systems clean pools using only natural salt, eliminating the ongoing need for environmentally unfriendly packaged chlorine.

Intex also operates one of the most comprehensive recycling program in the industry. We are one of the earliest companies in China to successfully obtain a license to ship consumer's returns in the original package back to China to be recycled. Our manufacturing waste repurposing program prevents used materials and scraps from going to landfills and instead they are re-used in the manufacturing process where up to 10% of annually produced PVC is recycled.

100% of our products are quality tested to be air tight before they leave our factory

Intex designs all of our own packaging for our products. We constantly challenge our methods of packaging to improve efficiency and reduce waste. More compact packaging techniques save cardboard while cutting down on space utilization, saving freight and fuel consumption. As a manufacturer, Intex knows it has a responsibility to manage the amount of waste produced. As an employer of over ten thousand people, we also encourage our own employees to recycle, reduce waste, and be conscious of the environment. Starting from recycling corners for all our worldwide office facilities, our factory has worked with the local government as well as through sponsorships with key partners to strengthen our efforts to be more eco-friendly. Intex has worked to provide incentives and seminars to employees as well as setting targets to reduce energy consumption. In addition, Intex has made significant investment in technology to achieve these goals. For example, we have implemented a frequency converter system which converts diesel to natural gas, installed solar water heaters and set up a recycled sewage system, and invested in equipment that reduces gas emissions.

From product design, to more efficient processes that save energy and reduce waste, to a world class recycling program, to more energy efficient offices, the people at Intex are striving to provide the best value products anywhere while constantly keeping our global ecosystem in mind.

INNOVATIVE FIBER-TECH™ TECHNOLOGY by INTEX®

An Incredible Night's Sleep Starts With a Single Thread...

more durable

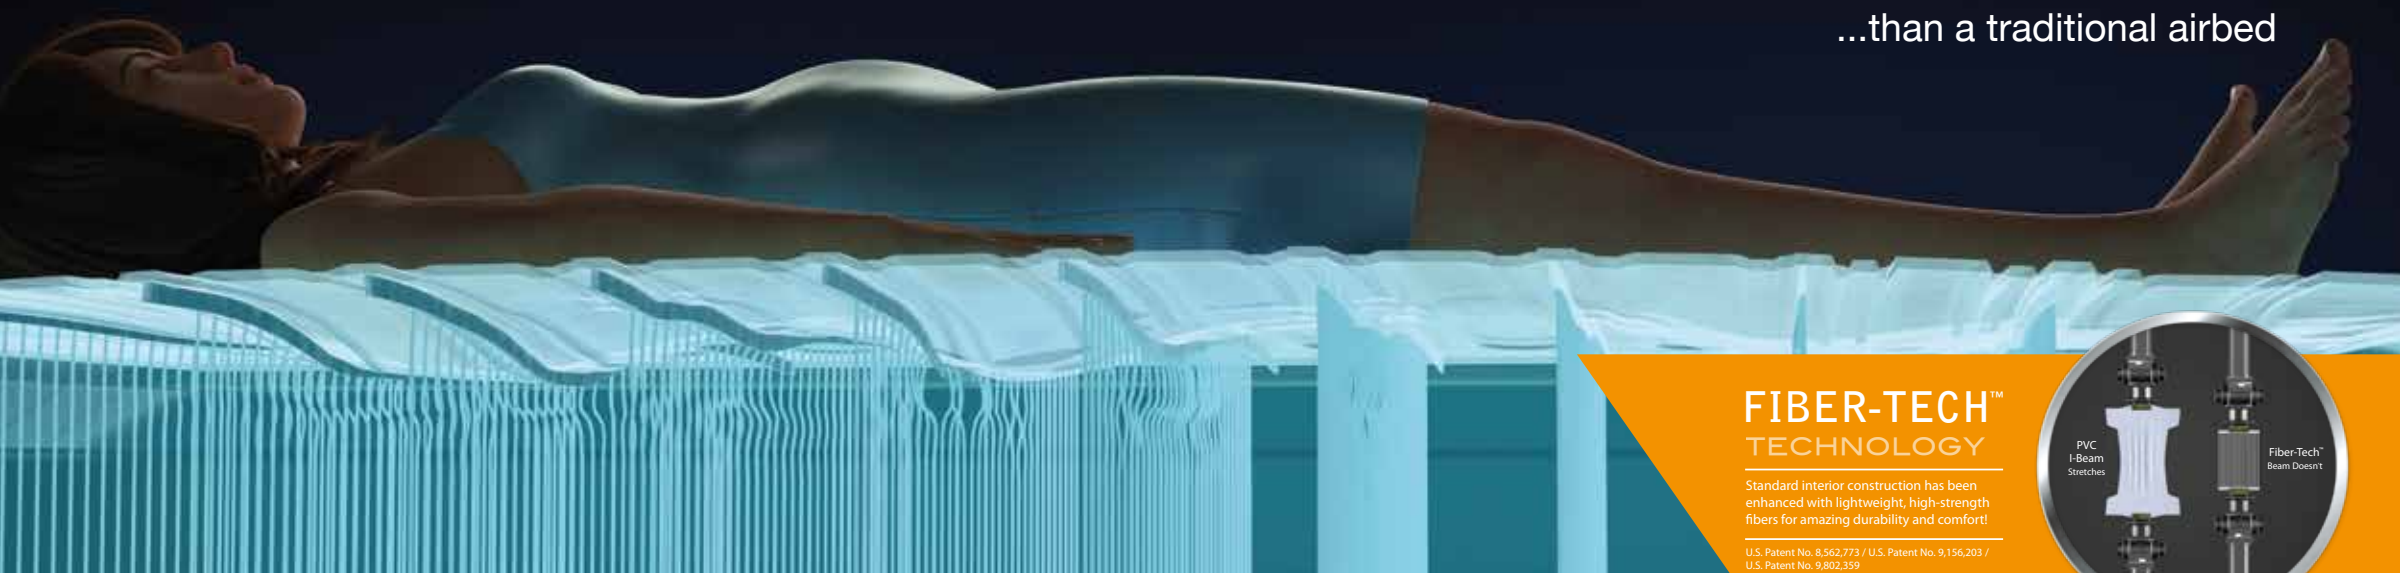

more supportive

lighter

...than a traditional airbed

FIBER-TECH™ TECHNOLOGY

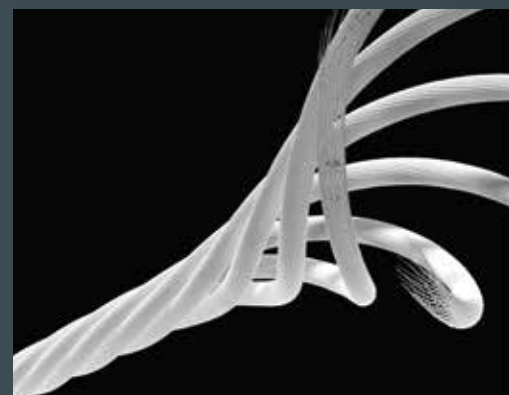

Standard interior construction has been enhanced with lightweight, high-strength fibers for amazing durability and comfort!

U.S. Patent No. 8,562,773 / U.S. Patent No. 9,136,203 / U.S. Patent No. 9,802,359

Designed for Comfort Engineered for Durability

Our innovative, patented Fiber-Tech™ Technology airbeds are comprised of thousands of high-strength polyester fibers. Unlike traditional airbed construction, these high-strength polyester fibers do not stretch over time, resulting in amazing durability for years of lasting comfort. Fiber-Tech™ interior construction provides the ideal firmness for superb support and rejuvenating sleep.

DURA-BEAM® PLUS SERIES

THE AIRBED COMFORT YOU
HAVE BEEN LOOKING FOR

Thoughtful touches and elegant design mean Dura-Beam® Plus airbeds take comfort to another level. Plush, elevated sleeping surfaces range in height from 14" to 20". Rest upon the superior support and stability offered by the combination of enhanced edge construction and our patented Fiber-Tech™ interior. These full-featured airbeds boast a powerful internal pump for quick and easy inflation and deflation. The comfort and convenience of a Dura-Beam® Plus airbed means your overnight guests can rest easy, and so can you.

DURA-BEAM® PLUS SERIES MID-RISE COMFORT

AIRBED WITH FIBER-TECH™ TECHNOLOGY

When your busy lifestyle calls for a bed that is equally at home, on the road in hotels, out in nature in a tent, or for entertaining overnight guests, you need a bed versatile enough to do it all while providing great comfort and convenience. Enhanced with Fiber-Tech™ interior construction, this bed is mid-rise 14" from the floor for easy accessibility, while providing more insulation from the cold floor. The unique bottom ring construction provides superior stability, and the soft, velvety sleeping surface ensures a good night's sleep. Powerful internal pump allows effortless inflation and deflation. Carry bag included for easy storage and transport.

ELEVATED WITH INTERNAL PUMP

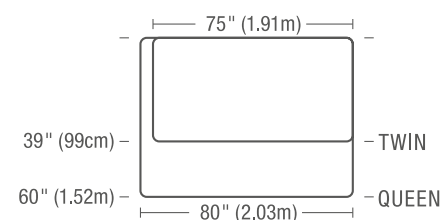

- Fiber-Tech™ Technology
- Mattress is raised 14" (36cm) from the floor for convenience
- Unique bottom ring construction provides superior stability
- Powerful internal pump for rapid inflation and deflation

QUICKFILL™ RECHARGEABLE PUMP features include:
- 3 interconnecting nozzles
 - A 12V DC power adapter for vehicle charging and a household AC power adapter for home charging
 - 12V DC to inflate and deflate while recharging
 - Automatic over-charge cut off for safety protection
 - New shape with easy carry handle
 - Built-in Battery charging indicator
 - MET approved (110-120V)
 - CE approved (220-240V)
 - Shelf box

- 66643E (110-120V) • 66644 (220-240V)**
QUICKFILL™ AC ELECTRIC PUMP features include:
- 3 interconnecting nozzles with hose
 - Thermo protector incorporated for safety
 - New shape with easy carry handle
 - TUV approved (110-120V model)
 - GS, CE approved (220-240V model)
 - Shelf box

- 68608E (110-120V) • 68609 (220-240V)**
QUICKFILL™ HIGH PSI INDOOR / OUTDOOR ELECTRIC PUMP features include:
- For both indoor and outdoor use — plugs into cigarette lighter or household electrical outlet
 - 3 interconnecting nozzles with hose
 - Inflates and deflates
 - 2-speed switch
 - Inflates athletic balls up to 12 psi
 - Increased air flow with reduced power consumption
 - Detachable DC cigarette cord
 - MET approved (110-120V)
 - GS, CE approved (220-240V)
 - Shelf box
