DURABLE EXTERIOR

Puncture-resistant 3-ply laminated material

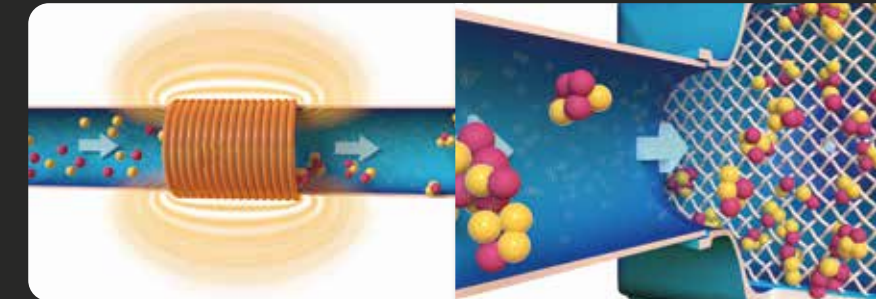

Top Layer:
Embossed heavy gauge PVC

Middle Layer:
Super-strength reinforced polyester mesh

Bottom Layer:
Embossed heavy gauge PVC

HARD WATER TREATMENT SYSTEM

Built-in Hard Water Treatment System makes water gentler on skin, clothes and the entire spa system.

The system generates an electromagnetic field that agitates calcium and other minerals in the water, causing them to create suspended crystals.

The suspended crystals of hard water elements are retained in the filter cartridge, leaving soft water in the spa.

Hard water buildup limits water flow and reduces the life of your spa.

HYDRO AERATION TECHNOLOGY™

Intex is proud to present you a new level of relaxation and water purity, by bringing revolutionary water aeration techniques into your backyard portable hot tub.

IMPROVED WATER CIRCULATION

Hydro Aeration Technology™ enhances filtration efficiency. Fine particles clump together and settle to the bottom of the spa during the aeration process, making it easier to remove and filter particles through the filtration system.

INCREASED NEGATIVE IONS AT WATER SURFACE

The aeration process increases negative ion concentration by infusing spa water with air.

ENHANCED POWERFUL AND SOOTHING BUBBLE JETS

By mixing air with water, the total volume of bubbles is increased to give you a more vigorous and soothing massage.
